

NAME _____

WEDNESDAY
NIGHT

Compare the decimals using the symbols $<$, $>$, or $=$.

I did the
Tenmarks web
assignment
last night.

$13.95 \quad 12.93 \quad 20.96 \quad \square \quad 2.02$

$16.68 \quad 20.09 \quad 17.8 \quad \square \quad 10.78$

$23.11 \quad 21.22 \quad 20.91 \quad \square \quad 2.82$

Find each sum or difference.

$5.15 - 2.67 =$

$1.2 + 4.2 =$

$4.04 + 2.46 =$

$8.1 + 6.3 =$

Write a number that fits each description below. In each number, do not use the same digit more than once.

A number greater than 70 with a 5 in the hundredths place.	
A number between 400 and 500 with a 2 in the thousandths place and a 7 in the hundredths place.	
A number greater than 12.75 and less than 12.8	
A number equivalent to 63.24 but not identical to 63.24	
A number that has a three in the tenths place.	

Find the products.

$20 \times 90 = \underline{\hspace{2cm}}$

$900 \times 40 = \underline{\hspace{2cm}}$

$50 \times 500 = \underline{\hspace{2cm}}$

$300 \times 900 = \underline{\hspace{2cm}}$

$70 \times 700 = \underline{\hspace{2cm}}$

$40 \times 70 = \underline{\hspace{2cm}}$

Use mental math to find each product or quotient.

$1 \div 10 =$

$73 \div 100 =$

$65 \times 10 =$

$94 \div 10^3 =$

$48 \times 10^2 =$

Find the product. Solve at least three problems.

$$\begin{array}{r} 49 \\ \times 47 \\ \hline \end{array}$$

$$\begin{array}{r} 92 \\ \times 30 \\ \hline \end{array}$$

$$\begin{array}{r} 83 \\ \times 77 \\ \hline \end{array}$$

$$\begin{array}{r} 85 \\ \times 12 \\ \hline \end{array}$$

$$\begin{array}{r} 87 \\ \times 19 \\ \hline \end{array}$$

$$\begin{array}{r} 28 \\ \times 44 \\ \hline \end{array}$$
