

NAME: _____

THURSDAY
NIGHT

I did the
Tenmarks web
assignment
last night.

Write the volume of each figure.

volume: _____ cubic units

volume: _____ cubic units

Marcus did a science experiment that involved growing a plant and collecting data about changes in the plants height. Use the coordinate grid to plot points to show the change in the plant's height over the course of 5 weeks.

# of weeks (x)	height (y)
1	2 inches
2	4 inches
3	6 inches
4	8 inches
5	10 inches

of weeks

Find the product. Solve at least three problems.

$$\begin{array}{r} 90 \\ \times 57 \\ \hline \end{array}$$

$$\begin{array}{r} 33 \\ \times 95 \\ \hline \end{array}$$

$$\begin{array}{r} 93 \\ \times 38 \\ \hline \end{array}$$

$$\begin{array}{r} 41 \\ \times 50 \\ \hline \end{array}$$

$$\begin{array}{r} 46 \\ \times 57 \\ \hline \end{array}$$

$$\begin{array}{r} 97 \\ \times 90 \\ \hline \end{array}$$

Find the unknown values. Be sure to show your thinking.

$$8\frac{4}{9} - 5\frac{2}{3} = c$$

$$j - 5\frac{2}{3} = 8\frac{11}{12}$$

$$c = \underline{\hspace{2cm}}$$

$$j = \underline{\hspace{2cm}}$$

Caden solved the division problem $827 \div 5$ using partial quotient division. He arrived at the quotient $166\frac{3}{5}$, but his answer is incorrect. Look at his work, shown to the right. What error did he make?

$$\begin{array}{r} 212\frac{2}{4} \\ 4 \overline{) 750} \quad 200 \\ - 800 \quad 10 \\ \hline 50 \quad 2 \\ - 40 \\ \hline 10 \\ - 8 \\ \hline 2 \end{array}$$
