1. Mason works at a laundry. He uses 214 pounds of soap in January, 471 pounds in February, and 447 pounds in March. If Mason has 1,500 pounds of soap to start with, how many pounds of soap does he have left?

4. Kayla has 46 socks. She washes them and discovers she now has 32. On her way home she loses another 12 socks. How many socks did Kayla lose altogether?

Look at each number in the top grid. Round that number <u>to the nearest ten</u> and find the rounded number in the bottom grid. Write the letters from the top grid onto the spaces in the matching box at the bottom. When done, you will have a joke and its answer. [The spaces show where the word breaks are.]
